COMPACT 360 AC/DC R.A.

ENG • Welding inverter designed to guarantee excellent welding qualities and be reliable and simple to use. For TIG welding using direct or alternate current and for welding all commercial coated electrodes. An easy to read overview simplifies choice between the various types of welding (MMA, TIG DC, TIG AC) and regulation of the various welding parameters, like initial, base, peak current, pulse, crater filler, up and down slopes, pre and post gas. The balancing function enables the ratio between penetration and cleaning of the weld pool to be regulated. It may be used with remote control or foot pedal control. Ideal for use in industry, on steel structural work, food industry, automotive. Water cooling ready.

IT • Inverter di saldatura progettato per garantire ottime qualità di saldatura, affidabilità e semplicità d'uso nella saldatura TIG in corrente continua e alternata e nella saldatura di tutti gli elettrodi rivestiti commerciali. Un semplice comando semplifica la scelta tra i vari tipi di saldatura (STICK, TIG DC, TIG AC) e la regolazione dei vari parametri di saldatura, quali corrente iniziale, base, picco, pulsazione, crater filler, tutte le rampe di salita e discesa, pre e post gas. La funzione di bilanciamento permette di regolare il rapporto tra penetrazione e pulizia del bagno di saldatura. Può essere dotato di comando distanza e a pedale. Ideale per industria, carpenteria, industria alimentare, automotive. Predisposizione al collegamento con gruppi di raffreddamento esterni.
